

# ELECTRICAL EQUIPMENT DISTRIBUTION

## Operational Requirements

- Large number of SKUs
- High volume of daily orders
- Counter service and shipping orders
- Strategic location with limited space

## Part Characteristics

- Parts of various sizes
- Non-standard and irregular components

**A good design is the  
starting point of every project.  
Start yours today.**

# INDUSTRY SPECIFIC STORAGE SOLUTIONS

## SMALL PARTS STORAGE

- Shelving with modular drawers
- Shelf mezzanines
- Vertical carousels
- VLM (Vertical Lift Module)

### Selection Criteria:

Number of SKUs

SKU velocity

Packaging type

Available space

## PALLETIZED PRODUCTS

- Standard pallet racking
- Double-deep pallet racking
- Drive-in racking
- Push-back racking
- Pallet flow
- VNA (Very Narrow Aisle)

### Selection Criteria:

Number of SKUs

SKU velocity

Picking method

Lifting equipment

Available space

## PVC & EMT CONDUITS

- Cantilever racking
- Vertical storage racking

### Selection Criteria:

Number of SKUs

SKU velocity

Picking method

Product weight

Available space

## WIRES & CABLES

- Racking for reels and spools
- Reel carousels

### Selection Criteria:

Number of SKUs

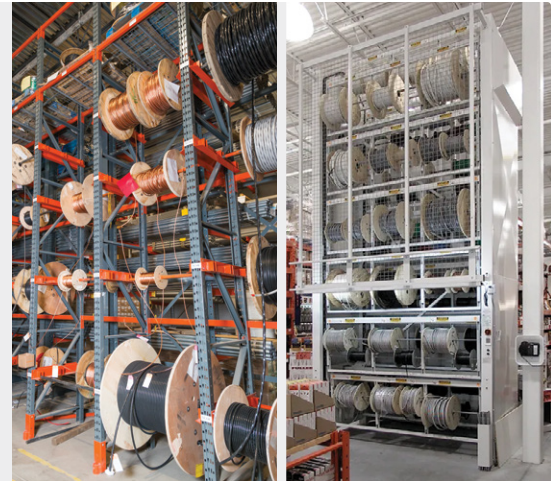

Weight of reels/spools

Picking method

SKU velocity

## HANDLING ACCESSORIES

Handling certain parts can be complex. We offer solutions to simplify your workflow:

- Reel and spool handler
- Cable dispensers

## CASE STUDY

### Initial Situation

- Large number of SKUs with diverse sizes
- Insufficient storage capacity
- Lack of space causing congestion and restricted movement

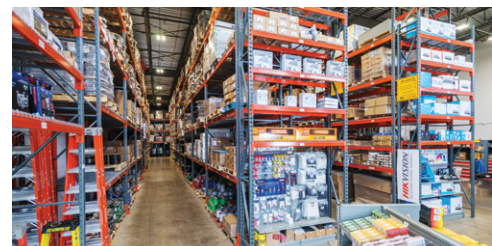

### Solution

- Expansion of available storage space by acquiring an adjacent unit
- Installation of multiple storage systems:
  - Shelving
  - Standard racking
  - Shelving with modular drawers
  - VNA
  - Cantilever racking
  - Reel racking for wire spools
  - Push-back racking

### Results

- Improved operational efficiency
- Continued collaboration on five additional warehouse optimization projects

# WHY MSK CANADA?

## Our Mission

MSK Canada's mission is to design workplace environments that optimize space, productivity, and safety for our clients.

## Who We Are

- Family-owned company founded in 1990
- Turnkey storage system projects and installation services
- Expertise in industrial engineering and technology
- A non-biased approach: Design comes first!

## WITH YOU FROM BEGINNING TO END

**Analysis of storage needs**

**Storage system design**

**Installation**

# OUR EXPERTISE

## Static Storage

Our industrial engineering technicians and engineers design the optimal storage layout to meet your operational needs.

## Automated Storage

Specification and installation of best-in-class storage automation systems, including:

- Integration with your ERP/WMS
- Project management
- Support from our in-house technical team

**A good design is the starting point of every project. Start yours today.**
